

# (SENIOR) ANALYST

Entrepreneurial? Driven? Passionate? Then A.T. Kearney has the career for you.

A.T. Kearney has been the driving force in helping our clients achieve and sustain significant competitive advantage. To accommodate the growing market need for analytical expertise to support our clients, A.T. Kearney Procurement & Analytic Solutions seeks to expand its talented team of Analysts and Senior Analysts. Together we will serve large and medium-sized corporate and government organisations in delivering advanced, collaborative and innovative solutions to the Board Room. Candidates will demonstrate an entrepreneurial spirit and a passion for being a thought-leader in the field of analytics driven solutions.

## Role Description

This role requires a creative and curious person who is able to quickly understand data requirements, learn these technologies and apply them to analyse, manipulate and validate data from a variety of data sources and platforms in order to deliver tangible results aligned to our clients objectives and success. As an Analyst, you will work on a broad range of projects involving data gathering and analysis and data management as well as applying new technologies like data mining, predictive modelling and optimisation to real life business problems. In addition, Senior Analysts demonstrate business acumen, proven analytics knowledge and strategic thinking. You will also be expected to take the lead on projects for all data related matters, train and mentor data analysts and assist senior management with project planning and proposals.

## Areas of Responsibilities

- Partner with Analysts and other team members to provide analytical rigor and technical expertise on client engagements and internal projects
- Understand our clients' business needs and develop accurate solutions
- Map where the information lies within complex corporations and work with our clients to gain access to the data
- Interview client contacts to validate data, collect qualitative information and gain client insight

- Analyze, manipulate, cleanse and validate data from a variety of data sources and platforms
- Create and deliver presentations of project findings, business requirements and data dictionaries to internal and client teams

## Your Personal Profile

- Minimum Bachelor's Degree with outstanding academic results from a top tier university, preferably in a quantitative discipline such as statistics, econometrics, quantitative methods, computer science, informatics, operations research, supply chain or logistics
- For Senior Data Analyst, a Master's Degree or PhD is preferred
- Demonstrate strong organizational, verbal communication and writing skills
- Fluent in English, second foreign language preferred
- Outstanding problem-solving skills to construct models that capture and analyse real life business situations
- Professional work ethic and integrity
- Flexible and adaptable to an intellectually challenging but rewarding career

## Your Technical Profile

- Advanced working knowledge of Microsoft Excel including reference formulae and PivotTables
- Familiarity with SQL and other querying tools such as SQL Server, MySQL, Oracle, Teradata and others. Senior Data Analysts are expected to have a working knowledge of such tools
- Strong analytical skills, including general statistics tools to structure, develop and interpret models
- Ability to sense-check data for abnormalities and working with the client team to resolve inconsistencies
- Understanding and knowledge of various optimization tools preferred (e.g., ILOG, Solver, etc.)
- Working knowledge of one or more of the following are preferred: VBA, SQL Business Intelligence Development Studio, Visual Studio, SPSS, SAS, JMP
